PREFACE

Annually, since 1873, when Frederick Leypoldt published THE AMERICAN CATALOG, the progenitor of PUBLISHERS TRADE LIST ANNUAL, the R.R Bowker Company has produced this well-known source of bibliographic data about in-print books and related products such as periodicals, prints, posters, audio cassettes, games, maps, cards, video cassettes, and the like. With the developments in technology and the information explosion of recent years, coverage has been expanded to include the products of micropublishers and database publishers as well. Within the pages of PTLA, librarians, booksellers, historians, and scholars can find information about publishers and their output that would normally require research in as many as three separate directories.

Publishers contractually *elect* inclusion in PTLA and those with sufficient titles to warrant space of four pages or more submit specially produced catalogs of their booklists. These are then alphabetically collated and bound together to give librarians, booksellers, and researchers easy access to complete book information. To accommodate the small presses and those specialist publishers who wish to participate in PTLA but whose output of titles falls short of the four pages required for catalog insertion, and for those publishers who choose not to supply printed catalogs in quantity, the yellow pages were created. These are bound into the front section of the volume and here publishers may use as much space as needed to list their titles, from single title listings to full pages.

Also included in the yellow pages are three indexes that have proven useful for book ordering as well as reference. The Index to Publishers includes publishers' addresses, e-mail, and web site addresses, and ISBN prefixes for the greater convenience of the user. This alphabetical listing of every publisher in PTLA gives the page number of the associated yellow pages listing or indicates with asterisks that the publisher has a catalog insertion. Following this index is the Subject Index to Publishers, which identifies the major subject specialties that are representative of the publishing program of each and enables the PTLA user to quickly find publishers in specific subject areas. The third index is the Index to Publishers' Series, which is an alphabetical listing by series name and identifies the publisher of each. A PTLA user may now identify the publisher of a series and turn to the catalog or yellow pages entry to be informed of all the titles within the series, availability, and price. The three indexes are compiled from information submitted by each participating publisher.

ORGANIZATION OF PTLA

- *Index to Publishers—Complete Publisher List including Addresses and ISBN Prefixes*

Publishers marked *** have catalogs inserted in alphabetical order in the bound volume; those with page numbers have listings in the yellow pages preceding the catalogs.

- *Subject Index to Publishers including Fields of Activity*

This section lists publishers under the headings that identify their publishing program.

- *Index to Publishers' Series*

Series names are alphabetically listed with the publisher of each.

- *Yellow Pages Booklists*

Consists of both *Display Ads* and *Line Listings*. Both types of ads represent smaller and specialist publishers whose listings vary in length from one title to several pages of publications, as well as publishers who prefer not to supply printed catalogs.

- *Catalogs*

Catalogs of four pages or more are inserted alphabetically by publisher immediately following the yellow pages.

Listings in both the catalogs and the yellow pages can, in most cases, be found to contain individual, descriptive annotations for each title, including publisher classifications of particular titles bearing a special discount.

USES OF PTLA

The publisher, bookseller, or librarian who refers to PTLA can quickly learn the scope of a publisher's list and specialties by referring to the Subject Index to Publishers section and by examining the publisher's catalog. The need to write for catalogs and to maintain a separate vertical file, and the danger of accidentally misplacing or discarding a much-needed publisher's list, is obviated by the convenience of having within reach alphabetically arranged, bound volumes of individual publishers' catalogs.

The self-produced publisher catalogs and lists appearing in PTLA follow no standard format and are unique in the various and varied information they carry. Each catalog/list, in addition to giving a publisher's full home office address, including telephone and fax numbers, may be used to:

- find a publisher's address and ISBN prefix
- locate publishers' special subject areas of publishing
- find titles in a particular publisher's series
- identify a book when only the publisher is known
- obtain information about an individual publisher's books through descriptive annotations
- research the latest mergers and imprints
- learn about discount schedules and return policies
- select more titles to fill out an order for a given publisher in order to qualify for a discount
- locate a publisher's overseas representative or subsidiary
- find the latest address and phone number of regional offices
- keep current on new warehouse facilities
- identify the International Standard Book Number (ISBN) assigned to a title

While we feel that all publishers owe it to themselves to be represented in PTLA, the decisions to participate remain with the publisher. Though the title may suggest that the volume contains only the lists of trade book publishers, it should be noted that textbook, law, and medical publishers are also represented in PTLA. In considering the impact of these individual decisions on the users of PTLA, it may be of historic (and current) interest to quote the statement made by Frederick Leypoldt in his Preface to the second edition of PTLA made more than a hundred years ago, and which is still apt today as it was then: "If booksellers and librarians would make it a point, whenever they find themselves disappointed by the absence of a list, to address the delinquent house with a word of regret, reproach, or argument, there will be no house of any account missing in next year's volume."

It is always our goal to make PUBLISHERS TRADE LIST ANNUAL an accurate and useful trade tool, giving the information most desired by those active in the world of books. We would be grateful for any word of recommendation or suggestion for improvement that will make PTLA of even greater use to its audience. For more information about R.R. Bowker databases and publications, visit our web site at http://www.bowker.com.

Vjecsner, Paul. ON PROOF FOR THE EXISTENCE OF GOD, AND OTHER REFLECTIVE INQUIRIES. 264 pages, 85 diagrams, index. ISBN 0-9619519-0-7 Clothbound $24.00

"a 'reexamination of basic presuppositions, old and new, in philosophy and sciences', this is a painstaking effort. Its stated purpose is to disclose how various truths such as free will, and including some now considered undemonstrable, 'can be reflectively demonstrated'. The author sedulously presents his 'process of inquiry' and then four chapters: on language and concepts; on self, mind, and external reality; on logic and mathematics; and finally on the existence of God, with further inquiries into 'the goodness of God and man' and 'heaven and immortality'. The chapters are independent but are cross-referenced, and 'premises on which conclusions there are based may be substantiated elsewhere'. A prospective reader, then, should not be misled by the title into expecting the early chapters to simply underpin the 'proof for the existence of God'. The caution that 'sections can be read individually by individual readers' could alert those interested expressly in that proof and not in the exercises of erudition, acumen, and reasoning skill that precede it."—*Thought* (Dec. 1989), Fordham University

"wonderful book" "I have read much in Chapter IV dealing with God. And I am fascinated"—Prof. H. Odera Oruka, *Chairman*, The Philosophical Association of Kenya

"a laborious study...produced a scholarly work. The author [in] this...followed Shri Ramakrishna Maharaj's advice: 'If a single dive into the sea does not bring to you the pearl, do not conclude that the sea is without pearls. Countless are the pearls hidden in the sea'". "The writer has used his...prowess and training in producing a book [that] will be a great addition to any library and serve as a reference book for any serious student in...pursuit of [an] academic career" —*Dharma Quarterly* (Vol. 33, No. 3-4), Malaysia

Welcome to the Next Generation of Information!

Dear Colleague,

On behalf of everyone at Bowker, it is my pleasure to introduce the 2001 R. R. Bowker catalog.

For decades, the year 2001 has symbolized the wonder and awe of a technology-driven future. In many ways at Bowker, the reality has caught up with the symbol. Many of our trailblazing innovations have helped revolutionize information technology — including some so remarkable that they would've been dismissed as science fiction just a decade ago.

It has always been Bowker's mission to respond swiftly to the changing information needs of the library, bookseller, and publishing communities. Today, the advances at Bowker continue at a whirlwind pace with ...

- **booksinprint.com™** — The world's premier book database is more useful than ever — with Hooks to Holdings™, order download capabilities, access to stock inventories, and new feature-packed sections like the Children's Room and Forthcoming Book Room
- **ulrichsweb.com™** — The most powerful serials research tool on the Web now features an enhanced interface, greatly improved functionality and content, Z39.50 compatibility, MARC record downloading, Hooks to Holdings™, and more
- **globalbooksinprint.com™** — This new Web database lets you access records for all titles in the U.S., United Kingdom, and Canada—with Australian and New Zealand titles to be added in mid-2001
- **e-booksinprint.com™** — This new FREE Web site represents the ultimate one-stop shop for e-books and books on demand, with listings for more than 125,000 titles.

...and with ongoing enhancements to our other Web site — **literarymarketplace.com** — and even more Internet resources in development.

Of course, Bowker remains your source for the "must have" cornerstone guides that have served generations of librarians, booksellers, and publishers with freshly updated editions of **American Library Directory, Children's Books In Print, American Book Trade Directory**, and **The Bowker Annual**, to name a few. All told, you'll find nearly 150 resources designed to meet today's information needs — in print, on CD-ROM, on tape, or on the Web — described in these pages.

I hope you will take a few moments to review them all. And from all of us at Bowker, welcome to the next generation of information.

Sincerely,

Mary V Cooney

THE WHOLE STORY

3000 Years of Sequels & Sequences

2nd Edition

Edited by John Simkin

"The definitive work to date in English covering sequels and novel sequences, The Whole Story quite simply eclipses all previous efforts. It is a crown jewel of bibliographic scholarship. Librarians everywhere will find it an invaluable source of information ... a reference work that is a pleasure to use and fun to browse. Simkin on sequels and sequences joins that select list of reference works known forever by an individual's name. An essential reference purchase for all but the smallest libraries."
—CHOICE (ABOUT THE FIRST EDITION)

Now the landmark guide to book series is updated and expanded in an essential new edition.

The Whole Story, Second Edition is the most comprehensive guide to English-language series and sequels ever published, with over 104,000 titles in 20,000 sequences by 14,500 authors — including 20,000 titles, 3,000 sequences, and 2,000 authors new to this edition.

Covering 3,000 years of literature from ancient Greek drama to Star Trek, **The Whole Story** features every kind of series — drama, novels, history, politics, religion, science, family stories, travel, humor, and crime — for adults, young adults, and children. It includes books by American, Canadian, British, Australian and other English-language authors, as well as thousands of titles translated into English.

This remarkable work is organized into three sections:

- A series list, with details of the titles in the 20,000 series, including dates of their first publication and notes concerning the authors, series, and related works
- An alphabetical list of over 104,000 titles with details of the series to which they belong
- An index of over 14,500 authors and the series to which they have contributed, with over 3,000 author cross-references

From *The Iliad* and its heroic sequel, *The Odyssey*, to the classic Babar series for children to the ongoing detective adventures of Kinsey Millhone, this unparalleled resource provides librarians, booksellers, and readers with the most complete information available on series and sequels.
From D. W. Thorpe.

> *I liked what I saw at the time, but I must say that it has even exceeded my expectations. I think you did a great job with this database — I like the list feature and that our faculty can select books and e-mail me their lists — and some of the other features and links to web sites are awesome! Thanks for providing such a nice product!*

You can easily retrieve, manipulate, and scrutinize nearly 250,000 citations from myriad perspectives, including nearly 1,000 subject categories, keyword, subscription rates, publisher name, title editor, publication date, format, publication status, refereed status, circulation figures, document supply availability, A&I services, and more.

Of course, you'll always find full serials ordering information plus contact information for some 80,000 publishers from more than 200 countries.

Innocent Casualties

The FDA's War Against Humanity

Revised Edition

Now in its 3rd Printing!

Elaine Feuer

"...a harrowing exposé of the FDA's war against any non-drug alternatives...Get the book."
Wayne Green, Ph.D., *73 Magazine*

"*Innocent Casualties* is a fascinating book that blows the whistle on the FDA."
Dr. Ronald Hoffman, "Health Talk," WOR Radio

"*Innocent Casualties* is one of the most fascinating revelations of the FDA which I have encountered. Elaine Feuer discloses the cunning and underhanded means used by the FDA to appear to be serving the people while actually abetting the cause of the international drug cartel."
James F. Scheer, *Health Freedom News*

"Read *Innocent Casualties* and get rightfully outraged by the FDA's inexcusable attack on American health. Feuer gives the reader ample and shocking documentation to make the case that our so-called food and drug regulatory office has become an 'undercover dictatorship' specializing in police tactics."
Sandra Weinstein, *Alternative Medicine Digest*

"Elaine Feuer goes where few dare to travel in her exciting exposé of the U.S. Food & Drug Administration. This is journalistic reporting the way it was meant to be!"
Reality Press

Innocent Casualties exposes one government agency's attempts to deny Americans access to nutritional products, including banning certain nutrients widely used in other countries and attempting to have vitamins classified as prescription drugs. *Innocent Casualties* documents a government agency so radical that, in 1992, its agents burst into a doctor's office—guns drawn—to seize vitamins and herbs.

Grace Girdwain's *Your Personal Guide to Immunization Exemptions* is a revealing and invaluable book which answers the tough questions faced by parents who desire to create the least confrontation and meet the smallest amount of resistance by states, for legal and valid reasons, while pursuing their own desire to protect their children's health and safety and meet proper compliance. Girdwain empowers the reader with page after page of serviceable and essential information regarding the proper way to gain release from required inoculations by explaining an individual's health rights and the importance of freedom of choice as it relates to these rights.

The Slouch in the Couch

Now in its 2nd Printing!

Stephen J. Hemenway

"Using an engaging rhyming text and brightly colored illustrations, *The Slouch in the Couch* promotes strong moral values."
Children's Bookwatch

One fine Saturday, a young boy wanted to play
But he could not have fun,
Because his homework was not done.
His mother was out, and he was alone,
When all of the sudden, the couch started to groan.
In surprise he jumped in the air,
Turned around, and saw a bag labeled "Rare."
From out of this bag did pop a creature
And, oh, what colors it did feature!
It gave him some looks, grabbed up his school books,
And off it did scurry.
The boy took to his feet, and although he was fleet
That creature was in a real hurry.
Enlisting a friend, they ran 'round a bend,
And again from thin air appeared the bag labeled "Rare."
Another creature popped out, the boy gave a shout,
And off they took after the thief of the books.
They finally cornered him, but can you guess where?
And what is the mystery behind the bag labeled "Rare?"

Is Your Child Dying to Be Thin?

A Workbook for Parents and Family Members on Eating Disorders

Now in its 2nd Printing!

Laura J. Goodman, M.Ed.

"Goodman's writing style is straightforward and nontechnical, making the book easily accessible and readable…."
Transcript, Medford, Massachusetts

"…written succinctly and in a layperson's terms…."
Republican-American,
Waterbury, Connecticut

This title is used in the treatment plans of the Massachusetts Eating Disorder Association and is recommended and sold by Gürze Books and Nutritional Counseling and Education Services, Inc., both of which review and distribute new books on nutrition and eating disorders for the health care profession and educational institutions.

Laura J. Goodman, M.Ed., is a psychotherapist specializing in the treatment of eating disorders. Once thought to be a "white, upper-middle-class female" problem, eating disorders have now spread across gender, race, and socio-economic lines. The causes are varied and complex; the symptoms are frustrating for the patient and those around him or her; the physical effects are serious, even deadly; and treatment is often complex. Because of this, parents and other family members are often left feeling guilty, angry, powerless, and confused.

Goodman draws upon her experience with persons afflicted with eating disorders and their families to address these feelings. In clear layperson's terms, she outlines the symptoms of three major eating disorders—anorexia nervosa, bulimia, and compulsive overeating—and discusses the various factors which contribute to the development of these disorders, highlighting various treatment approaches.

World War II: Letters from Home, 1942-1944

Frances W. Field

World War II: Letters from Home, 1942-1944 is a compilation of selected letters from Frances W. Field to her husband, Albert S. Field, Jr., during his service as a company surgeon in World War II. Touching and intelligent, the selections offer an intimate, lyrical portrait of an extraordinary time in American history: a time of personal sacrifice and suffering balanced against the necessity of winning "the good war."

Dr. Field was part of a large American contingent that arrived in North Africa in the fall of 1942. He left behind his pregnant young wife but not—as these letters vividly attest—the world of their marriage. Frances W. Field's letters to him are rich with vivid detail of her inner and outer life. She chronicles her travels amidst the homes of family and friends and is deftly observant of the people she meets and the conditions and attitudes of a country at war. Her correspondence fuses the larger scope of a world oddly and forever changed with the delicate poignancy of the effect of her husband's absence.

That absence is the presiding force in her life and the principal inspiration for her correspondence. The America of her time, strangely devoid of its young men, is a remarkable, resilient community which fosters a moving and heartfelt backdrop for Field's personal experiences during the twenty-six months of her husband's service.

World War II: Letters from Home, 1942-1944 is a work both acutely observed and beautifully written. It is romance which ultimately transcends events and thus deserves a place amidst other great love stories of our time.

Yes, Mr. Selznick: Recollections of Hollywood's Golden Era

Marcella Rabwin

For fifteen years, Marcella Rabwin was in regular association with the most legendary actors and actresses in the history of film. She assisted them, went to parties with them, and even developed lifelong friendships with some.

Her nostalgic memoir *Yes, Mr. Selznick: Recollections of Hollywood's Golden Era* is an endearing reminiscence about her employment as executive assistant to Hollywood producer David O. Selznick, who is best know for producing the renowned classic, *Gone with the Wind.*

In this intriguing and charming work, Rabwin candidly describes private moments shared with such stars from Hollywood's premier Golden Era as Lucille Ball, Carole Lombard, Judy Garland, Desi Arnaz, and Marilyn Monroe. In her many years working in Hollywood in the 1930s and 1940s, Rabwin saw some fascinating off-screen spectacles, such as Lombard parading in a monkey suit and Ball doing a striptease.

Rabwin collected memories of this Hollywood era privy to few and is bound to captivate—and shock—readers with her revealing recollections. A moving and delightfully entrancing work, *Yes, Mr. Selznick* is a story no one should miss reading.

A Noble Spirit

Alvin L. Morton

A comprehensive and intriguing compilation of the memories of many individuals who served in the 303rd Bomb Group of the U.S. Army Air Corps during World War II, Alvin L. Morton's *A Noble Spirit* is sure to fascinate readers of all ages. Morton imparts a sense of the bravery and sacrifice put forth by both men and women as he honors those who gave all for the cause of freedom.

Poignant recollections interspersed with humor and romance provide a balanced look at life during those turbulent times, while anecdotes written by those who served provide an up-close and personal account which history textbooks cannot rival.

Morton successfully employs a mixture of prose and poetry to describe the extreme range of emotions felt by those who lived during those times: from fear and homesickness to wonder and hope.

Adding interest and aiding understanding are many charts, photographs, reproductions of wartime documents, maps, and other visual aids. Translations of U.S.-distributed propaganda leaflets pointing to the absence of the Luftwaffe over Berlin and diary entries illustrating the logistical difficulties faced by those manning the stations in the aircraft are engaging and educational.

Through the words of those who served, readers will gain a sense of the patriotism, camaraderie, and mutual respect felt among the members of the squadron. Morton's approach in including the experiences of a wide cross section of involved individuals provides a depth of scope not found in works featuring only one viewpoint. Veterans and non-veterans alike will share in a tribute to those brave Americans who served their country.

During World War II, a select platoon of Marines comprised of Navajos devised and employed a secret code using their native tongue, a code which proved totally undecipherable to the enemy, enabling American forces to prevail in the South Pacific.

First published by Dorrance in 1973, *The Navajo Code Talkers* remains the single most comprehensive account of the contribution of the Navajo Native Americans in World War II. Its authentic photos and illustrations have been featured on CBS Television's "An American Portrait" series, and the book itself has been profiled on the ABC *Nightly News*. It is also among the select 10 percent of all books written by white men or women on the Native Americans to be chosen by the Navajos for display in their tribal museum.

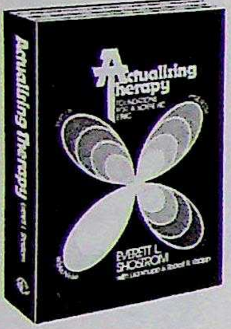
ACTUALIZING THERAPY: Foundations for a Scientific Ethic

Everett L. Shostrom with Lila Knapp and Robert R. Knapp



Actualizing Therapy
Everett L. Shostrom

In *Actualizing Therapy,* the authors develop a theory described as "creative eclecticism," merging and building upon concepts and approaches to therapy espoused by various schools of psychological thought. The emerging eclectic system is defined as the process by which thought occurs, integrating thinking, feeling and bodily expression approaches to psychotherapy. *Actualizing Therapy* represents not only a process of growth but, further, a philosophy of life embracing change on the basic polarities of Anger - Love and Strength - Weakness as a central emphasis.

—ON THE COVER—

MEN OF THE DAY — CXXXV MR. GEORGE HENRY LEWIS

Nearly sixty years ago there was established in Ely Place a firm of solicitors, to which twenty years ago there was admitted you...Of this firm George Lewis, now a man of three and forty, was and is the peculiar ornament, and accordingly it has been found that those who mean to win are well-advised to put their case, whatever it may be, in his hands. He is indeed an astute lawyer, of aspirations not bounded by the ordinary professional limits. He delights to conduct a case himself in all courts in which a solicitor is admitted to practise; and in such courts he has again and again encountered and signally overthrown some of the greatest luminaries of the Bar. In matters of finance and speculation his is especially competent, for he is believed to know enough to hang half the people in the City, and there are, consequently, few of them who can stand up undismayed against his cross-examination. In the cases of Overend, Curney, and Co. of Barned's Banking Company, of the Ottoman and Smyrna Railway Company, and of the scuttling of the Severn, he showed himself a master of the City sciences; besides which he has acquired a considerable reputation as a manager of journalistic cases. He has thus acquired for his firm a distinct position as the defenders of the unwary; and besides being the solicitor to three daily and to several weekly newspapers, he is also the permanent official adviser of Lloyd's Salvage Association, of the Stock Exchange in its private winding-up of defaulting members, of the Charity Organisation Society, and of the Dramatic Authors' Society.

Mr. Lewis is, in addition to all this, very largely consulted by members of his own profession in delicate matters which never see the light, and he has recently distinguished himself during the inquiry into the death of Mr. Bravo in a manner not likely to be forgotten. He has a considerable acquaintance among persons connected with finance, journalism, and the theatres, and any such who find themselves in legal trouble could probably not find a better guide than him to a haven of safety through the technicalities of the law and the dispositions of magistrates and jurymen. On the whole, he is a remarkable instance of the manner in which the much-lauded distinction acts that is still kept up between barristers and solicitors, to the prejudice of solicitors.

—Susan Kirkpatrick, author of
Las Románticas: Women Writers and Subjectivity in Spain, 1835–1850

Feminist scholarship has entered an age of internationalism during the past two decades, as evident in the wider range of cultural and national traditions now included in historical and literary studies. Yet, as Lisa Vollendorf points out in her introduction to this volume, "Spain is one of the countries that remain on the margins of the debate. Despite a growing number of feminists in all regions of Spain, Spanish women do not appear as either authors or subjects in anthologies of feminist thinking and criticism published in English."

Hoping to redress this neglect, the editor of *Recovering Spain's Feminist Tradition* has gathered nineteen completely new essays on women writers who either call themselves feminist or deal with feminist issues in their work. Hailing from the medieval period to the present and representing a broad range of genres and topics, these women—court writers, nuns, housewives, journalists, politicians, among others—trace the historical roots of Spain's feminist consciousness and emphasize its rich intellectual traditions. The contributions provide a balance between writers well known in Spain and those who have only recently received critical attention—from Saint Teresa de Jesús and María de Zayas to Emilia Pardo Bazán and Montserrat Roig. The last three essays in the volume focus on Spain's "double minorities": Catalan women writers.

This fascinating and insightful collection merits a place in the libraries of students and scholars of world literature, Spanish history, and women's studies.

Teaching Tudor and Stuart Women Writers

Susanne Woods and
Margaret P. Hannay, eds.

Teaching Tudor and Stuart Women Writers summarizes the latest scholarship on British women writers who lived from roughly 1500 to 1700 and suggests strategies for presenting their works in the classroom. Thirty-six essays discuss frequently anthologized pieces by such women as Margaret Cavendish, Elizabeth I, Mary Sidney, and Mary Wroth as well as the writings of women who have come to the notice of scholars only recently.

"This collection represents absolutely first-rate scholarship—it is at present the only study of its kind, and an indispensable guide to classroom instruction and individual research in the field."

Texts and Translations

Designed for classroom use, the MLA Texts and Translations series publishes works not otherwise available at reasonable prices. The original text and the English translation of each work in the series are published in separate volumes that can be used individually or together for advanced language instruction and for courses in literature and history; the translations have proved popular with general readers as well.

SOFYA KOVALEVSKAYA

Nihilist Girl

Natasha Kolchevska with Mary Zirin, trans.

First published in Switzerland in 1892, finally printed in Russia in 1906, and never before translated into English, *Nihilist Girl* is the coming-of-age story of Vera Barantsova, a young aristocrat who longs to devote her life to a cause. Her privileged world is radically changed by Alexander I's emancipation of the serfs. Vera first hopes to follow in the footsteps of Christian martyrs, but a neighboring landowner—a liberal professor fired from his position at Saint Petersburg University and exiled to his estate—opens her eyes to the injustice in Russia.

Literary Research Guide

An Annotated Listing of Reference Sources in English Literary Studies

3rd edition

James L. Harner

James L. Harner's *Literary Research Guide*, which *Choice* calls "the standard guide in the field," evaluates important bibliographies, abstracts, surveys of research, indexes, databases, catalogs, annals, dictionaries, and other important reference materials in English studies. In the third edition Harner has added entries describing resources published since 1992 and has revised nearly half the entries from the second edition. The third edition contains more than 1,200 entries; the annotations discuss an additional 1,331 books, articles, and electronic resources and cite 752 reviews.

The MLA Guide to the Job Search

A Handbook for Departments and for PhDs and PhD Candidates in English and Foreign Languages

For over two decades graduate students—more than 25,000 of them—have relied on the Modern Language Association's guide for job seekers in the academic market. Updated and greatly expanded, *The MLA Guide to the Job Search* offers students invaluable advice on seeking jobs at two- and four-year colleges and universities, as well as outside the academy. It suggests when to start looking, how to begin, where to apply, whom to ask for letters of reference, which materials to include in a dossier, and what to expect from interviews and campus visits.

An Introduction to Bibliographical and Textual Studies

3rd edition

William Proctor Williams and Craig S. Abbott, eds.

This edition outlines the study of texts' composition, revision, physical embodiments, process of transmission, and manner of reception. It discusses why these matters are central to a historical understanding of literature and shows how the insights, methods, and products of bibliographical and textual studies can be applied to other branches of scholarship. The volume also surveys established practices in the field and indicates areas of current debate and development. It concludes with an appendix on the generally accepted style for textual notation, a reference bibliography, a handy glossary, and an index.

"What Williams and Abbott have managed to do . . . is remarkable."

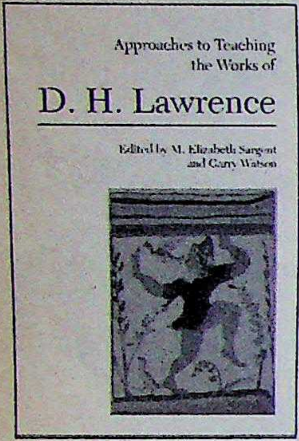
Approaches to Teaching World Literature



The Works of D. H. Lawrence

M. Elizabeth Sargent and Garry Watson, eds.

"Teaching Lawrence is problematic because of the strong responses he arouses in readers," observe the editors of this collection of essays. Lawrence's forceful language, imagery, and rhythms can make readers feel they are being attacked or challenged. In essays that attempt to "suggest the rich intellectual possibilities inherent in teaching material that generates such heat," contributors in this Approaches volume describe ways to encourage students to read more closely, accurately, and sensitively and to learn how to complicate their reading.

Boccaccio's *Decameron*

James H. McGregor, ed.

"What separates the *Decameron* from most of the canon is that it is fun to read," says James McGregor in his preface to this Approaches volume. "Though its narrators sometimes weep, they laugh much more often." Many instructors find this laughter easy to replicate in the classroom. Boccaccio's highly teachable work is easily excerpted, and the essays in this collection describe stimulating ways to introduce these enjoyable tales to undergraduates.

While some teachers offer ideas for studying Boccaccio's work in religious or historical contexts, others discuss its critical reception and literary precedents (such as the *Thousand and One Nights*). Still others investigate the complex roles women play in the tales, the sexual content of many of the novelle, and the influence of the *Decameron* on European literature. A final trio of essays explores possibilities for presenting Boccaccio alongside the visual arts of illustration and film and for teaching the work as hypertext using the *Decameron Web*, an Internet resource developed at Brown University.

Woolf's *To the Lighthouse*

Beth Rigel Daugherty and Mary Beth Pringle, eds.

"Good, motivated, well-read students can have trouble reading *To the Lighthouse*," admit the editors of this volume; "not-so-well-read students may have even greater difficulty." Yet many instructors still find Woolf's fifth novel her most accessible because it grapples with issues that interest students. The essays in this collection show how teachers can handle the threatening question "Why are we reading this?" with thoughtful answers that make the novel come alive in the classroom.

Like other books in the series, this volume is divided into two parts. Part 1 discusses the available editions of the novel and further reading for students, as well as reference works, bibliographies, critical works, and teaching aids. In part 2, twenty-one essays focus on how to read *To the Lighthouse* and present a range of critical approaches, including autobiographical, contextual, and intertextual methods.

Shakespeare's *Romeo and Juliet*

Maurice Hunt, ed.

Taught widely in high school and college, *Romeo and Juliet* may be Shakespeare's most accessible work. Teenagers and young adults identify with the play's interfamilial conflict, the love story, and the defiance of parental authority. Nevertheless, readers of all ages are often perplexed by the Bard's poetic language, the "unrealism" of the characters' eloquence, and the embedded sonnets. Essays in this book address these challenges and others and offer instructors imaginative strategies for dealing with them.

The first part, "Materials," reviews the most widely used anthologies of Shakespeare's plays and the many available editions of *Romeo and Juliet*, as well as background materials for the instructor and recommendations for student reading. The second part, "Approaches," presents practical ideas for the classroom. A final section describes scenarios for teaching the play through dramatic technique and for using *Romeo and Juliet*'s many adaptations, including the popular Zeffirelli and Luhrmann films.

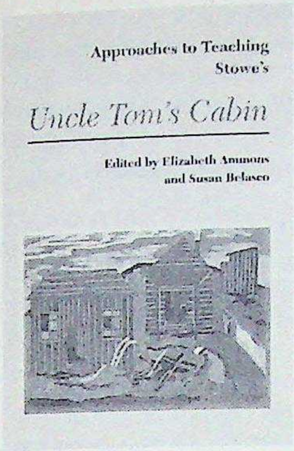
Approaches to Teaching World Literature



Stowe's *Uncle Tom's Cabin*

Elizabeth Ammons and
Susan Belasco, eds.

Although rarely found on college syllabi just two decades ago, *Uncle Tom's Cabin* is (according to an MLA survey) one of the most frequently named additions to nineteenth-century American literature courses. The inclusion of this political, sentimental, and incredibly popular novel introduces a host of issues to the classroom: the novel's place in the canon of women's literature, the historical importance of its commercial success, the status of Stowe's work as "good" literature, and—perhaps the greatest challenge to teachers—the topic of race.

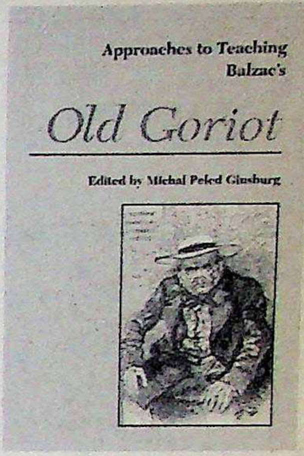
Balzac's *Old Goriot*

Michal Peled Ginsburg, ed.



Old Goriot is not only the most read of Balzac's works but also one of the most commonly taught of all French novels. As Michal Peled Ginsburg writes in the preface, this collection of essays offers "fresh interpretations that reflect on and revise the critical tradition." It thus conveys a sense of what Balzac's realist novel may mean to students and teachers more than a hundred and fifty years after its first publication.

The first seven essays examine the novel in different contexts, such as the genre of the realist bildungsroman and the values promoted in the moral philosophies of Balzac's day. The next seven essays present diverse approaches, including feminist and psychoanalytic interpretations. The last four essays discuss teaching the novel in courses on French culture, comparative literature, urban history, and other topics.

Literature as Exploration

5th edition

Louise M. Rosenblatt
with a foreword by Wayne Booth

In *Literature as Exploration*, Rosenblatt presents her unique theory of literature and focuses on the immense, often untapped, potential for the study and teaching of literature in a democratic society. Her "transactional" theory of literature examines the reciprocal nature of the literary experience and explains why meaning is neither "in" the text nor "in" the reader. Each reading is "a particular event involving a particular reader and a particular text under particular circumstances." And teachers of literature, Rosenblatt argues, play a pivotal role in influencing how students perform in response to a text.

Redrawing the Boundaries

The Transformation of English and American Literary Studies

Stephen Greenblatt and Giles Gunn, eds.

In this collection of essays, twenty-four leading scholars examine the major developments that have expanded the horizons of English and American literary studies during recent decades. *Redrawing the Boundaries* reviews the significant scholarship for major historical periods and surveys new directions in literary criticism and in composition studies. Each essay is accompanied by an annotated list of suggestions for further reading; the book concludes with an extensive list of works cited and a name index.

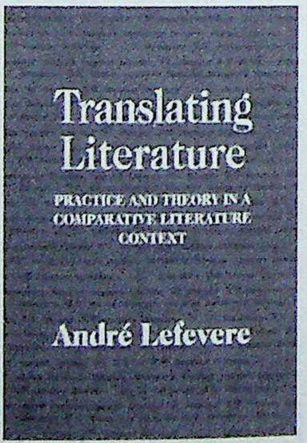
Translating Literature

Practice and Theory in a Comparative Literature Context

André Lefevere



Designed for the growing number of courses on literary translation, *Translating Literature* discusses the process and the product of literary translation, incorporating both practical advice for translators and theoretical discussion on the role translations play in the evolution and interpretation of literatures. Exercises and examples highlight problems in translation. Lefevere shows that translations, like history, criticism, and anthologization, are part of a tradition of "rewriting" and are instrumental in the development and the teaching of literatures. *Translating Literature* concludes with an extensive bibliography of translation studies.

Will the Postal Service Go Private?
edited by Edward L. Hudgins

The rise of the Internet and the proliferation of private package-delivery services have brought the U.S. Postal Service to a crossroads. As more people correspond and pay bills online, what is the role of the Postal Service? Do we really need a monopoly that continues to run huge deficits, or is it time to consider other options? Sixteen economists, scholars, and business leaders offer a variety of answers. September/Cloth $19.95 ISBN 1-930865-01-5/Paper $10.95 ISBN 1-930865-02-3

The "precautionary principle"—a "better safe than sorry" rule—is increasingly invoked to justify government regulations to stop potential environmental problems such a global warming, genetically-modified foods, and DDT. The author argues that not halting such potential crises might entail health risks, but so might their regulation. He argues that a balanced application of this principle cautions against aggressive regulation. October/Cloth $17.95 ISBN 1-930865-16-3

How much do Americans spend each year taking wealth from others or protecting their own wealth from being "redistributed"? From locks to lobbyists, cops to campaigns, Americans spend over $400 billion a year on either taking someone else's wealth or protecting their own. This book makes a significant contribution to both political science and economics in terms a layman can understand. October/Cloth $19.95 ISBN 1-930865-10-4/Paper $8.95 ISBN 1-930865-11-2

Most Americans know little about Medicare even though they rely upon it. Sue Blevins examines the program's origins, its evolution, and future policy options to reform it. Medicare fails to provide catastrophic coverage yet costs far more than originally estimated. Until Americans learn the real history of Medicare, they won't understand how to reform it. GLOBALIZATION
Tomas Larsson

Swedish journalist Tomas Larsson takes the reader on a fast-paced, worldwide journey from the slums of Rio to the brothels of Bangkok and shows that access to global markets helps those struggling to get ahead.
